

## Santa Fe Compact2

The Santa Fe Compact2 is specifically designed for crawlspaces. At 12" tall and 12" wide, the Santa Fe Compact2 can fit where no other dehumidifier can. Innovative features such as integrated vertical or horizontal exhaust outlets offer flexibility even in exceptionally tight spaces, while the optional condensate pump, hang kit, and duct kits facilitate installation in the most challenging applications. No conventional dehumidifier can perform as efficiently and effectively in crawlspaces as the Santa Fe Compact2.

## Features:

**High Efficiency** – Exceeds Energy Star® efficiency requirements.

**Large Capacity** – The high capacity Santa Fe Compact2 provides 70 pints per day of water removal at standard rating conditions. Medium-sized crawlspaces (up to 1800 sq. ft.) are no problem for the Santa Fe Compact2.

**Low Temperature Operation** – Engineered for crawlspaces, and the temperature and air flow issues that they present. When many conventional dehumidifiers have stopped removing water from the air, the Santa Fe Compact2 keeps on protecting you and your home.

**Superior Air Filtration** – MERV-8 filtration is standard on the Santa Fe Compact2. This superior level of air filtration also keeps the Santa Fe Compact2 working at peak efficiency for longer than other devices with cheaper designs.

**Auto Restart** – Santa Fe dehumidifiers will automatically restart at the original setting after a power outage.

**Optional Equipment** – The engineers at Therma-Stor designed remote ducting kits, hang kits, caster kits and condensate pumps for use with the Santa Fe Compact2. These optional kits provide the ultimate in flexibility for your specific installation requirements.

## SPECIFICATIONS

**Part Number:** 4033600

**Blower:** 150 CFM @ 0.0"

**WG Power:** 580 watts @ 80°F and 60% RH

**Supply Voltage:** 115 volt – 1phase – 60 Hz

**Current Draw:** 5.1 amps

**Operating Temp.:** 49°F Min., 95°F

**Max. Sized for:** 1,800 Sq. Ft. - Typical

**Minimum Performance at 80°F and 60% RH**

Water Removal: 70 Pints/Day

Efficiency: 5.0 Pints/kWh

Energy Factor: 2.4 L/kWh

**Air Filter:** MERV-8, Standard Pleat

Size: 9" x 11" x 1"

**Power Cord:** 9', 115 VAC, Ground

**Drain Connection:** 3/4" Threaded Female NPT

**Drain Hose:** 8' Direct Gravity Drain Hose (5/8" ID x 7/8" OD)

**Refrigerant Type:** R410A (Refer to manufacturers label for more information)

**Refrigerant Amount:** 15 oz.

**Unit Dimensions:** Width: 12", Height: 12", Length: 21"

**Weight:** 55 lbs

One of the best Limited Warranties in the industry today –

2 YEARS – All Parts and Labor

5 YEARS – Sealed Refrigeration System
